

In the matter of Sinclair Broadcasting airing an anti-Kerry program 2 weeks prior to the election, without offering an opposing viewpoint, I implore the body of the FCC to consider the damage being done to our system of democracy by this and similar illegal acts. The citizenry demand equal protection under the laws of fair communications. Please stop corporate greed from supplanting the public need. I lived in a third world country where this practice was accepted; we laughed at that country's polarized system of government then, yearning for the freedom of the USA; we are no longer laughing. We are becoming the third world. Please protect us from further decline of our public airways! Laura Curiel, Lexington, KY
